(to the editor of the "times and seasons.")
On the 16 th of April, 1843, a respectable merchant, by the name of Robert Wiley, commenced On the 16th of April, 1843, a respectable merchant, by the name of Robert Wiley, commenced
digging in a large mound near this place; he excavated to the depth of ten feet and came to nd quite a number of the citizens, with myself, repaired to the mound, and after making ample opening, we found plenty of rock, the most of which appeared as though it had been strongly burned; and after removing full two feet of said rock, we found plenty of charcoal and ashes, also human bones that appeared as though they had been burned; and near the eciphalon a near the small end, and a ring through them all, and clasped with two clasps. The ring and clasps appeared to be iron, very much oxidated: the plates first appeared to be copper, and had the appearance of being covered with characters. It was agreed by the company that should cleanse the plates. Accordingly I took them to my house, washed them with soap and water, and a woollen cloth; but findigg them not yet cleansed, 1 treated hem wich dilute sulcovered with characters, that none, as yet, have been able to read. Wishing that the world might know the hidden things as fast as they come to light, I was induced to state the facts, oping that you would give chem an insertion in your excellent paper, for we all feel anxious to know the true meaning of the plates, and publishing the facts might lead to the true translation. They were found, judge, more than twelve feet below the surface of the top of the
W. P. HARRIS, M.D.
The following Certificate was forwarded for publication at the same time :-

We, citizens of Kinderhook, whose names are annexed, do certify and declare, that on the 3 rd of April, 1843, while excavating a large mound in this vicinity, Mr. R. Wiley took from rery much oxidated. The bands and rings on said plates mouldered into dust on a slight pressure. ROBERT WILEY, G. W. F. WARD, FAYETTE GRUBB, GEORGE DECKENSON, J. R. SHARP, W. LONGNECKER, IRA S. CURTIS, W. FUGATE.

## (from the " quincy whig.")

SINGULAR DISCOVERY.
A Mr. J. Roberts, from Pike county, called upon us last Monday with a written description
of a discovery which was recently made near Kinderhook, in that county. We have not room
for his communication at length, and will give so much of a summary of it as will enable the reader to form a pretty correct opinion of the discovery made.
It appeared that a young man, by the name of Wiley, a resident in Kinderhook, commenced digging into a mound, and finding it quite laborious, he invited others to assist him. Finally a comWiley. After penetrating thed to the mound, and assisted in digging out the shaft commenced by apparently been subjected to the action of fire. They removed the stones, which were that had easy to handle, to the depth of two feet more, when they found SIX BRASS PLATES, secured and fastened together by two iron wires, but which were so decayed that they veadily crumbled to dust upon being handled. The plates were so completely covered with rust as almost to obliterate the characters inscribed upon them; but after undergoing a chemical proin length, one inch and three quarters wide at the top, and two inches and three quarters wide at the bottom, flaring out to points. There are four lines of characters or hieroglyphics on each. On one side of the plates are parallel lines runsing lengthwise. A few of the characters resemble in their form the Roman capitals of our alphabet: for instance, the capital B and X appear very distinct. In adation, there are rude representations of three human heads on bling those which usually surround the head of Christ in the pictocial illustrations of his person. There are also figures of two trees with branches, one under each of the two small heads, both leaning a little to the right. One of the plates has on it the figure of a large bead by itself, with two pose pointing directiy to it.
In the place where these plates were deposited were also found human bones, in the last stage of decomposition; also some braid, which was at first supposed to be human hair, but on
a closer examination proved to be grass; probably used as a covering for the bodies deposited there. This was also in the last stage of decay. There were but few bones found in the mound, and it is believed that it was but the burial place of a small number, perhaps of a person, or family of distinction, in ages long gone by, and that these plates contain the history of the times, or of a people, that existed far-far beyond the memory of the present race. But alone can reveal.
On each side o
is a tree growing that measures which this discovery was made, was a mound, on one of which great ansiquity of the mound, and of course all that is buried within them. These mounds, like others that are found scattered all over the Mississippi valley, are in the form of a sugar loaf.
The plates above alluded to were exhibited in this city last week.
