November

As the rays of light beguins to dawn from the king of Day Caled the sun The sun stationary in the East is daily scene Sheadding light to all around Its daily doings Is hardly known by mortal man On the Earth As man is many on the Earth some in darkness Others of light Yet in a mass They all as one stand a looking as to se what is to come But the set time has arived for the curse to be removed that all as one may have a chance to well perform the work of God Altho many a sitting in groups with skins bare And scanty allowance yet they on God Now have a claim as the curse because of Progenetors is soon to be removed Their forms and sise Does not agree as they in looks and sizes do much differ They in aray do move because of Darkness that on them rests But the set time for them has ariven that the curse on them has now been removed that they are priveleged to do and act as seemeth them Good They thus are agents To say and do and are to be judged according to works But as they have ben in a fallen state they cannot keep a celestiall Law that they can enter into the presance of the Father and Son Yet if perchance some should perform in obediance to a celestiall Law they in the presance of the Father and Son will have a rest That is of worth But those that do not this work perform agreeable to the Law of God but are honest in their doings as far as they know and have not faith to sore above the groveling things of time they then will have delightsom home of which the moon is a tipe Again there is many of the Jentile race that have ben and are honest in doings on the Earth that often falls on the wright and left that they secure a Terestial rest Again there is more provision made to accommodate the race of man It is a rest That of it many bost as it ketches all Except those that sin against the Holy Ghost The stars of this rest does freely speak from brite to dim Of all grades Those that say to do but come short of fully keeping the Law of God in the round will become an heir of a telestial kingdom No more to go out

As this is a day set apart by the Antient of Days to meet in council they at this time have met in Council A decision is past To bring to light dark sayings that have lain long in the Dark As dark sayings is many a vale must be rent to es-

tablish an order a new on Earth As minds is many All in one must move that a Union may be established amongst the Chosen of God As wisdom shall direct Let all move being directed by the Antient of Days As at this time is a desision in honour of the Son of God as he rules and governs this planitary mass By doing and sayings as seemeth him good As he has now took a stand a work for to do to clens and purify and make all clean Again he has come the wicked to opress and put his Law in forse As his Law is easy for man to perform no shadow of turning will be received A decision is past that an order may arise governed by Agents to the Antient of Days As they with the chosen will daily move teach them In the path of duty that they may well do their work

A theme of things is now to arise by legally orthorised servents on the Earth A kingdom must be reard In honour of God that long has ben looked for By Antient saints As the time has ariven for man to be known delays will no more answer But all things must move both in Heaven and on Earth as many is a waiting for the time to come that long since died From the first age down to the presant time They are all impatiently a waiting for the time to arive that they on Earth can take a stand to prepare for a more Glorious rest It is to gain wisdom from on high by wise teachers That was resorected at the Meridean of time as many arose In newness of light by being quickenedd by the Resorecting spirit that they with the Saviour did arise As they was on a planit of rest anxiously awaiting to come forth that they have stood as mineut men and cheerfully don as they was shone Their Labours have ben many In days past and gone In keeping records of things that have transpired down to the presant time as no man on Earth has it performed but is kept in Heaven by the spirits of the just perfecteded But the time has ariven for man to arise and honour himself by keeping an impartial History of what Daily transpires Let no one endeavour Evil deeds to hid as a day of reveiling secrets is at hand The time will soon arive the doings to solve of things that have ben don whether wright or wrong But the doings of the L D Saints is first in voge Then comes the doings of the Antients back to the first age of the world Then will be unriddled a mistry of worth speaking of this planit and its work before time began As it has had a Standing above fifty thousand years since it took its departure from the sun From that time to the presant it has often changed By the wisdom of God that many have moved and honoured themselves by living in obedience to the Law of God As Satan or the prince of Darkness has in all ages had power from time to time Since the Earth was formed Altho they
